

To the citizens of the Margareta Local School District:

As I started to prepare my thoughts for this writing many things came to mind. It began with many positive memories of Margareta Local Schools and the education I did receive there. Those same memories have been reflected upon many times whether it was family, one's career, Faith or the community one has chosen to live in. The opportunities available at Margareta Local Schools have allowed me to attend and graduate from The Ohio State University, live and work in other communities and to enjoy a professional career. I do believe that these blessings are a result of opportunities made available to me, beginning with the education I received from Margareta Local Schools. By supporting the opportunities of a quality education with extra curricular activities and academic programs currently available at Margareta Local Schools, not only will the students benefit the entire community will, by having a solid and supported school system.
