

To the Citizens of Margareta Schools,

As a past graduate of Margareta High School, I would like to voice my appreciation for the education and "preparation for life challenges" I received while attending Margareta schools. I hope that current and future students will also be as prepared to take their next steps toward becoming successful community members. The quality education I received at Margareta prepared me for college and the challenging professional world of today.

The opportunity to learn in the comfort of a small rural school district enables students to have the ability for specialized education programs and extracurricular activities. How we support our children's school teaches them about our values and priorities as a community and as individuals. The health of a school system directly impacts every facet of a community. I am extremely proud of and happy with the value and depth of education that I received as a student at Margareta schools.
